

Q1. Functional units interaction.

Q2. Instruction execution cycle.

Q3. Bus Organizations.

SINGLE BUS ORGANIZATION.

- * One bus for all communication.
- * Simple.
- * Slower [more contention].

MULTI - BUS ORGANIZATION.

- * Separate buses for CPU, Memory, I/O.
- * Faster.
- * More efficient communication.

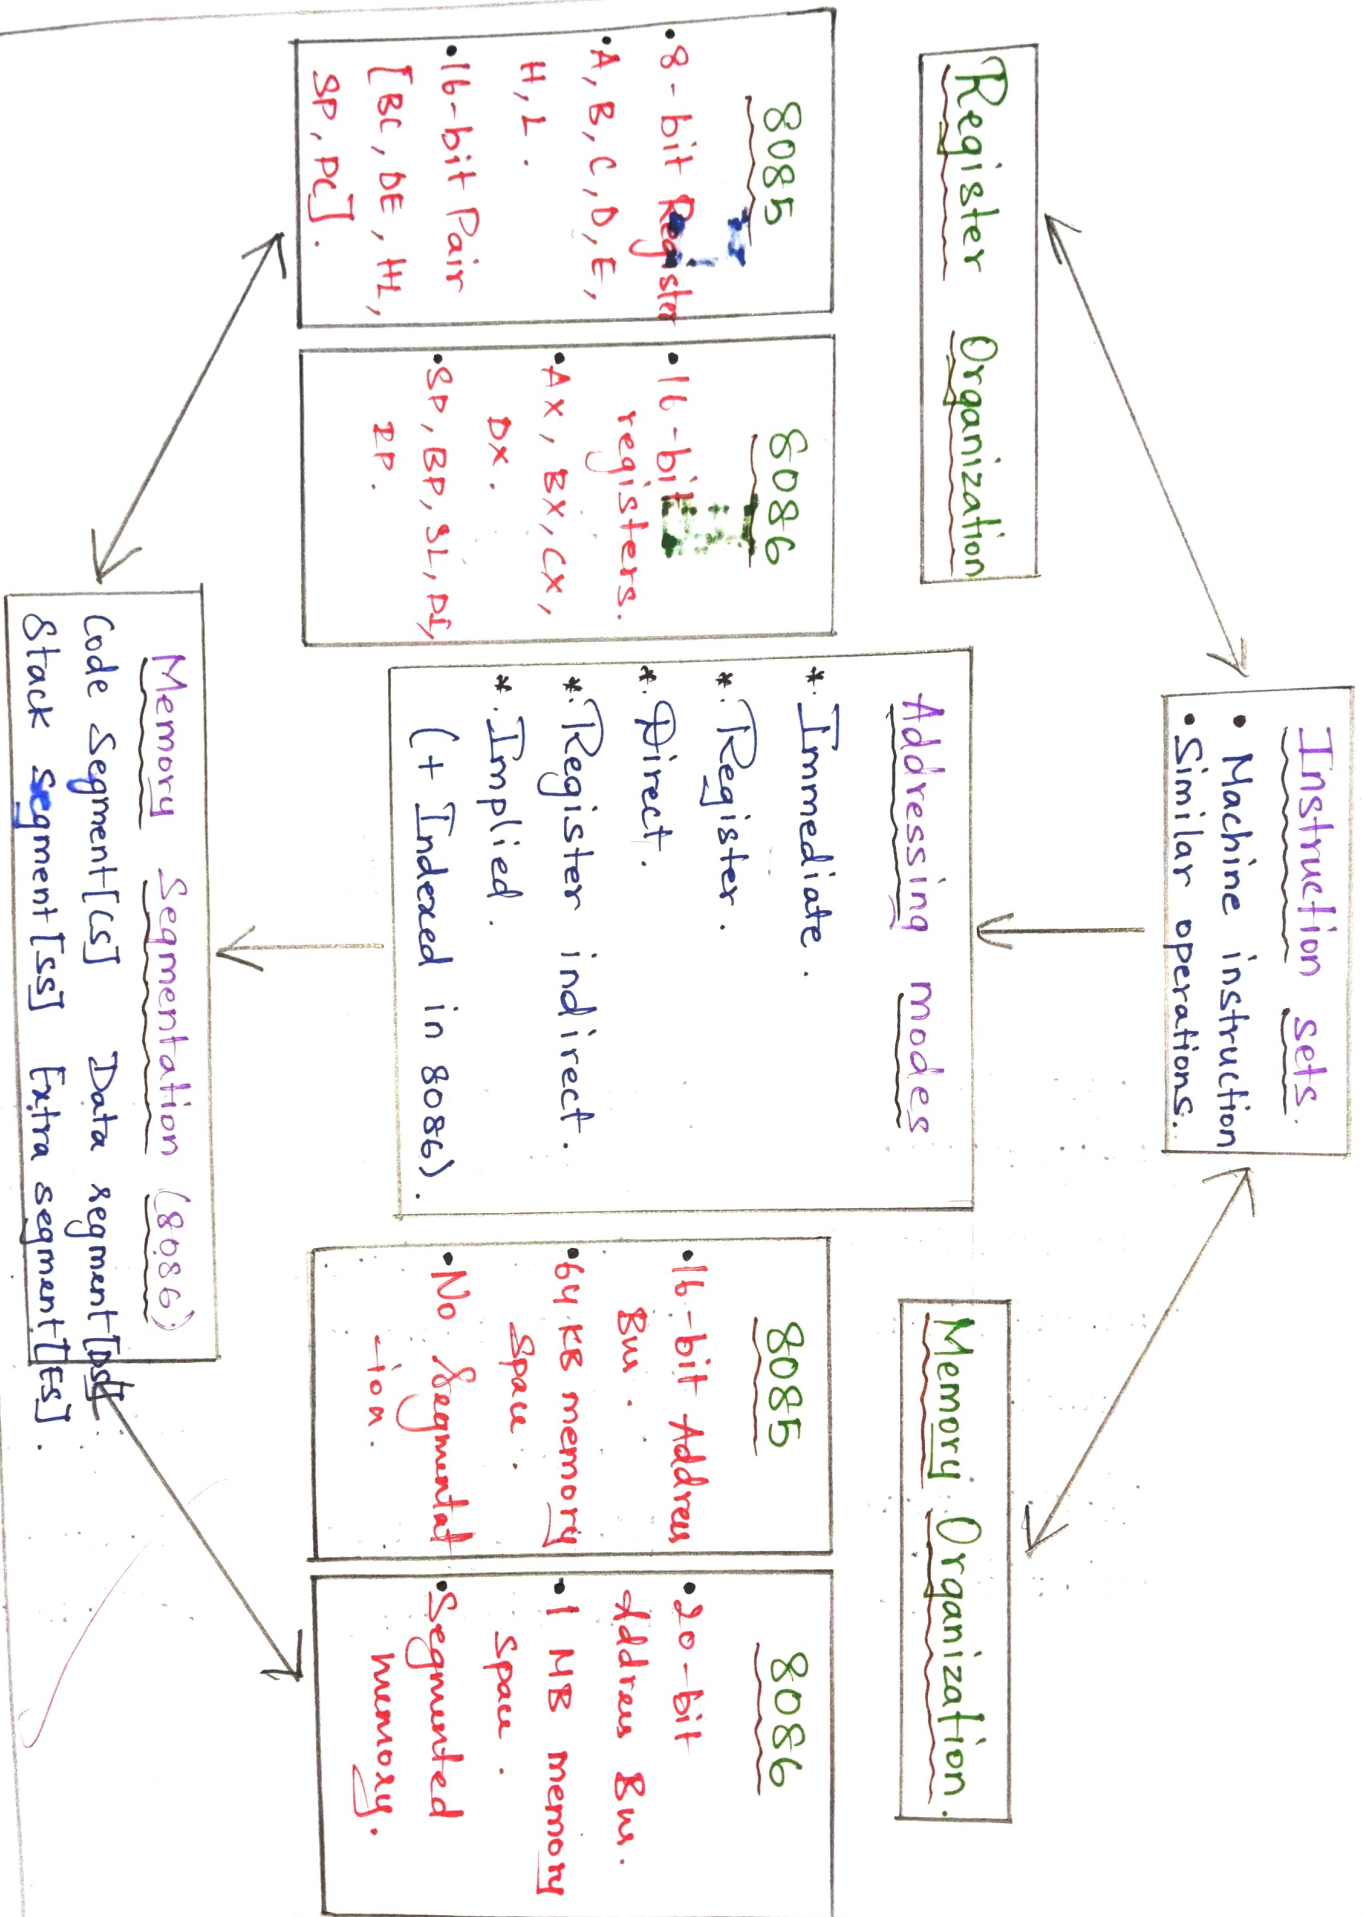

HIERARCHICAL BUS ORGANIZATION.

- * Bus hierarchy [levels].
- * High speed.
- * Reduces bottlenecks.

Q4

8085 vs 8086 ARCHITECTURE

RELATIONSHIPS.

Q5. BINARY & HEXADECIMAL IN COMPUTER SYSTEMS.
